

Forengers Foundation & Ashwath Sumana Trust Collaboration Plantation Drive

“WE ROOT AS WE ROUTE”
Plantation for a sustainable future.

 28th June,
Nagathali, Maval

Environmental Benefits

Air Quality

Trees act as natural filters, removing particulate matter & absorbing pollutants like Nitrogen oxide and Sulfide Dioxide.

Water Conservation

Root system reduce storm water runoff, preventing erosion and filtering water before it reached our taps.

Climate Control

Strategic planting provides shade and releases moisture, naturally cooling the neighbourhood and reducing other reliance.

Our Mission:

Restoring Biodiversity

A Home for Nature

Plantation plays a vital role in restoring biodiversity and ecological balance across rural landscapes. Our selection of native tree species is intentionally curated to support local pollinators, enrich avian habitats, strengthen regional ecosystems and boost rural economy.

NATIVE SONGBIRDS

POLLINATING BEES

BENEFICIAL INSECTS

Medicinal plants
**Neem, Amla, Arjuna,
lemon grass**

Fruit-Bearing Trees
**Mango, Guava, Jackfruit,
Lemon**

Ecological Guardians
Coconut, , Amla, Neem

Memories from our Plantation journey

Community Mobilization

United For Cause

The drives did more than just plant trees; it planted seeds of Community ownership.

Volunteers from diverse backgrounds collaborated, fostering social cohesion and a shared sense of responsibility for our local environment.

Summary

Our plantation drives effectively engaged the community in taking concrete climate action. This report highlights both the immediate results and the anticipated long-term benefits of the tree-planting initiative.

 **200+** Native sapling planted

 **25+** Volunteers participated

 **90%** initial survival rate increases

200+

Saplings Planted

25+

volunteers
participated

We extend our sincere gratitude to the Ashwath Sumana Trust for making this initiative possible. It was a truly rewarding experience to be a part of this effort and contribute to such a meaningful cause.
