

School Environmental Awareness

Session :

Waste management

In collaboration with Ashwath Sumana Trust

04th July, 2026
Vimlabai Lunkad Vidyalaya,
Gultekadi

School Environmental Awareness Session:

The 3Rs of Waste Management

Reduce

Helps the environment by decreasing the amount of waste we produce and using fewer natural resources. It also saves energy and reduces pollution caused by manufacturing and transporting new products.

Recycle

Recycling helps convert waste materials into new products, reducing the amount of waste sent to landfills. It also conserves natural resources, saves energy, and helps reduce air and water pollution.

Reuse

Reusing items helps reduce waste and extends the life of products. This means fewer new products need to be made, which saves natural resources, energy, and reduces pollution.

Our Mission: Creating awareness, inspiring change

- Create awareness about responsible waste management.
- Encourage reducing, reusing, recycling, and waste segregation.
- Explain the harmful environmental effects of landfills.
- Help students understand the impact of everyday choices.
- Inspire responsible habits for a cleaner, healthier, and sustainable future.

Reducing our carbon footprint by making eco-friendly choices.

Recycling to conserve natural resources & reduce the waste sent to landfills.

Reusing instead of throwing away things to reduce waste.

Memories from 4th July

CHOOSE
TO
REUSE

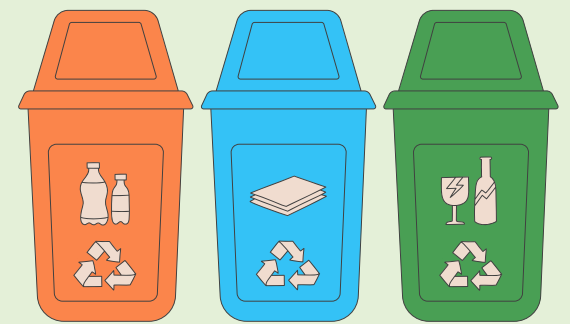

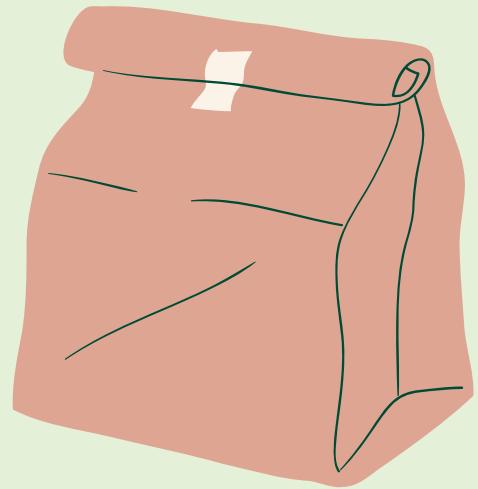

Community Mobilization

United For Cause

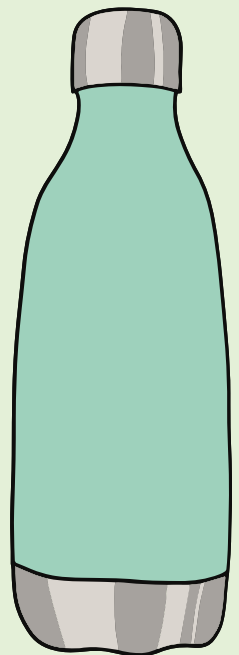

The drive successfully educated students about sustainable practices and environmentally responsible choices. Key areas covered included:

- Using reusable steel tiffins and bottles to reduce plastic waste and exposure to microplastics
- Understanding the harmful environmental impact of landfills
- Practising waste reduction and proper segregation
- Participating in a paper bag-making activity to explore sustainable alternatives

Through this initiative, students were encouraged to adopt responsible everyday habits and contribute to a cleaner, healthier, and more sustainable future.

Summary

Our Environmental Awareness Session session effectively engaged the students in understanding the importance of waste management and the long term harm of ignorance. This report highlights the topics covered during the session and the response of the participants.

60+

Paper bags were
made

58+

students
participated

**We sincerely thank
Ashwath Sumana Trust for
collaborating with Forengers
Foundation on the School
Environmental Awareness Session on
Waste Management.**

The Path Forward

- ◆ Scientific and Strategic Planning
- ◆ Long Term Nurturing (tree planting)
- ◆ Community Lead Initiatives
- ◆ Multi-stakeholder holder Collaboration
- ◆ Adaptive Management And Monitoring
